Euro area countries (19)

Austria , Belgium, Cyprus , Estonia , Finland , France, Germany, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Portugal, Slovakia, Slovenia, Spain,

EU Member States with currencies other than the euro (9)

Bulgaria, Croatia, Czech Republic, Denmark, Hungary, Poland, Romania, Sweden, United Kingdom

Non-EU countries & principalities (8)

Andorra, Iceland, Liechtenstein, Monaco, Norway, San Marino, Switzerland, Vatican City

Please note that you can only initiate payments in HSBC Connect or HSBCnet File Upload

debiting HSBC accounts in the following countries:

· United Kingdom, Belgium, Ireland, Netherlands, France, Germany, Spain, Italy, Malta, Greece, Czech Republic, Poland, Luxembourg and Switzerland

The SEPA Credit Transfer (SCT) payment instrument is exclusively used for transfers of monies in Euro (EUR). All accounts are identified via an International Bank Account Number (IBAN). Charges are always shared between ordering party and beneficiary; in the payment message this should not be specified.

SCT's are classified as ACH payments and will be processed as a batch of payments (i.e. one debit / multiple credits).

In addition to the transfer of the EndToEndIdentification, SCT payments support one line of up to 140 characters for payment details. Payment details are accepted as unstructured remittance information.

Characters must be encoded using UTF-8. ISO 20022 has decided to restrict to only UTF-8 based on the fact that it is the most efficient (length-wise) way to transport characters.

In accordance with EPC guidelines (see EPC132-08 published by the European Payments Council), references, identifications and identifiers must respect the following:

- Content is restricted to the Latin character set
- Content must not start or end with a '/'
- Content must not contain '//'s

Salary payments can be made using code word SALA in this field.

Based on the SALA code word the consolidated bulk debit will be booked on your account statements so that individual entries of beneficiary names are not visible on the statements.

In case of any rejection the name and IBAN account number of the beneficiary will be masked in pain.002, Camt.054, account statements and other reporting formats.

Please note that this functionality of providing SALA code is not available for SEPA transactions initiated from United Kingdom, Germany, Poland, Czech Republic, Malta and Switzerland.

If you are using HSBCNet File Upload or Authorisation then the beneficiary accounts will be visible in which case you may have to open separate account for Salary and provide entitlements to the required users.
