How do I activate my mobile device authentication for HSBCnet with a Security Device?

As an HSBCnet user, you can now use your internet-enabled Mobile Devices such as mobile phones or tablets to authenticate yourself when logging on and accessing HSBCnet services.

Before you begin

To be able to use your Mobile Devices for authentication purposes,

- Request your System Administrator to first enable the feature in your HSBCnet profile
- Next, download the HSBCnet Mobile App from the Apple or Google Store
- You will only be able to register one device per username and a device can only be registered to one username.

Note: This guide explains the mobile device activation process if you have been assigned a Security Device by your System Administrator. If not, please refer to the guide on How do I activate my mobile device authentication for HSBCnet without a Security Device?

Setting up your Mobile device

Here’s how to set up your mobile device for authentication in the HSBCnet app once you have been granted permission by your system administrator.

1. Open the HSBCnet Mobile App and log on by entering your username and a code from your security device.

Log on to HSBCnet with your Username and security code

2. From the home page, select More to access additional options on a new screen. Next, choose Settings from the menu,
3. On the Setting screen, choose the **Mobile authentication** toggle button to enable.

**Enable mobile authentication**

4. You’ll be asked to re-authenticate yourself. Enter your security code and select **Continue** once finished.

5. Next, choose **Enable log on notifications** to allow us to send you messages when we require you to authenticate using your mobile device.

6. You also need to select **Enable location tracking** so we can verify it’s you when you access HSBCnet.
7. Now, create a 6-digit PIN that you will use when you are accessing HSBCnet with your mobile device. Re-enter your PIN to confirm the number. Choose Continue when finished.

Select and confirm a security PIN

8. An acknowledgement confirms that you have successfully completed the setup. You can now log on to HSBCnet with your mobile device.
9. Before you proceed, did you know that you can set up your biometric to access HSBCnet? **Note:** this option is only available if your mobile device supports biometric authentication. To do so, select **Set up biometric authentication in the acknowledgement screen**. Read and accept the Terms and Conditions of your biometric. You’ll be prompted to verify your biometric according to your device settings.

10. An acknowledgement confirms the successful biometric setup. You are now ready to access HSBCnet using your biometric.

**Biometric setup and acknowledgement**
11. You can maintain your device PIN, or biometric setup or reset your device PIN in the Mobile App settings at any time.

**Manage biometrics and PIN via device Settings**
